UNIVERSITY MISSION
Cavite State University shall provide excellent, equitable and relevant educational opportunities in the arts, science and technology through quality education and relevant research and development activities. It shall produce professional, skilled and morally upright individuals for global competitiveness.

Department of Information Technology
First Semester S.Y. 2023-2024
ITEC 101 – Human Computer Interaction II
Long Quiz Midterm
SET A

14

General Instruction: Read the following questions. Wrong answer is wrong. Erasure is not allowed, and Alteration of the final answer is not permitted.

I. Multiple Choice (10 points)

1. ☒ A What is the main goal of user-centered design?
 - A. Make the system look modern
 - B. Prioritize user needs and usability
 - C. Add more complex features
 - D. Reduce the need for user testing
2. ☒ B If a website does not indicate loading progress, which usability principle is violated?
 - A. Visibility of system status
 - B. User control and freedom
 - C. Error prevention
 - D. Match between system and real world
3. ☒ B Which of the following is an example of direct interaction?
 - A. Using a keyboard shortcut to copy text
 - B. Clicking a button to submit a form
 - C. Coding a command in a terminal
 - D. Using voice commands to control a system
4. ☒ A Which prototype type is least expensive but still useful for testing concepts?
 - A. Paper sketch
 - B. High-fidelity prototype
 - C. Fully functional prototype
 - D. Animated prototype
5. ☒ B A website with too many categories and subcategories might cause:
 - A. Easy navigation
 - B. Cognitive overload
 - C. Increased user engagement
 - D. Stronger user retention
6. ☒ B What type of navigation lets users apply filters such as price, size, or brand?
 - A. Hierarchical navigation
 - B. Global navigation
 - C. Faceted navigation
 - D. Local navigation
7. ☒ C What usability testing method involves observing users perform real tasks?
 - A. A/B Testing
 - B. Heuristic Evaluation
 - C. Usability Testing
 - D. Card Sorting
8. ☒ A A login page does not show password requirements before the user submits their password. What heuristic is violated?
 - A. Error prevention
 - B. Recognition rather than recall
 - C. Flexibility and efficiency of use
 - D. Aesthetic and minimalist design
9. ☒ B What does Fitts' Law suggest about UI design?
 - A. Bigger targets are easier to hit
 - B. Scrolling is better than clicking
 - C. Users should always remember commands
 - D. Icons should be the same size
10. ☒ B What is the purpose of wireframing?
 - A. Improve final product visuals
 - B. Plan the layout and structure
 - C. Test website speed
 - D. Write user manuals

True or False (10 points)

1. ☒ T A user flow diagram helps visualize how a user navigates an interface.
2. ☒ F Error messages should be technical and detailed to help users debug the issue.

CBY: Del
Castillo

Department of Information Technology
First Semester S.Y. 2023-2024
ITEC 101 – Human Computer Interaction II
Long Quiz Midterm
SET A

13. ☒ A usability test should always have at least 100 participants.
14. ☒ A mobile app with touch gestures only follows an indirect interaction model.
15. ☒ Prototypes should always be high-fidelity before testing.
16. ☒ Users generally prefer systems that require memorization rather than recognition.
17. ☒ A card sorting exercise helps determine how users categorize information.
18. ☒ Navigation menus should be consistent across all pages.
19. ☒ A flat site map is best for websites with large amounts of content.
20. ☒ Error prevention helps users avoid making mistakes in the first place.

III. Identification with Choices (10 points)

21. ☒ HEURISTIC EVALUATION is a usability testing method where experts evaluate a system against guidelines.
22. ☒ USABILITY refers to the ease with which a user can interact with a UI element.
23. ☒ PROTOTYPE helps designers plan the structure of a webpage before full development.
24. ☒ EASY NAVIGATION helps predict how users will navigate a system.
25. ☒ VIEW LIMITS & FREEDOM suggests that larger buttons are easier to click.
26. ☒ HIERARCHICAL NAVIGATION helps to observe real user interactions and measure usability issues.
27. ☒ OPEN CARD SORTING ensures navigation is available on every page of a website.
28. ☒ SCUS GROUP is a research method where users group similar topics together.
29. ☒ ERROR PREVENTION prevents user errors before they occur.
30. ☒ USABILITY EVALUATION simulates a step-by-step user task to identify design issues.

IV. Matching Type (31-40)

COLUM A	ANSWER	COLUM B
Error Rate	31. D	- A. Analyzing user performance in a simulated setting
Storyboarding	32. E	- B. A sequence of images to visualize a process
Hierarchical Navigation	33. I	- C. A structured way to organize content
A/B Testing	34. G	- D. Comparing two UI versions for effectiveness
Recognition vs. Recall	35. B	- E. Making information visible rather than requiring memorization
First Click Testing	36. F	- F. Evaluating the first action a user takes
Heuristic Evaluation	37. H	- G. Testing a UI against usability principles
Affordance	38. J	- H. Design properties that suggest an element's function
User Control & Freedom	39. A	- I. Allowing users to undo or redo actions
Learnability	40. C	- J. How easily new users understand a system
